THE HARDEST ROSES OBTAINABLE

OUR ROSE BUSHES are grown under the most ideal conditions to be found anywhere in the "great outdoors." The soil in our nurseries is composed of the "cream" of the mountains combined with the animal and vegetable decompositions of the plains for ages past. Soil moisture is supplied by a natural sub-irrigation which never fails. A long, sunny growing season tapering off to a fall of gradually lowering temperatures, ripens the plants ready for digging without the artificial drying process which is so devitalizing to rose plants.

Our plants are all budded on a cutting Multiflora Japonica of our own selection which has proven hardier and more vigorous than any other strain in commerce and which produces a rugged fibrous root system practically guaranteeing successful transplanting. We are experienced rose growers and are preceded by three generations of plant propagators.

All those conditions of soil, climate, understock and human understanding, combined with direct producer-to-consumer service, reveal the secret of the success our customers have with our plants. We take this opportunity of thanking our many friends for their spontaneous expressions of satisfaction.

TERMS OF SALE

Cash must accompany orders, with certain exceptions as follows: A 25% deposit will hold an order until one month before shipping date, when full amount of money must be remitted. In the case of horticultural societies ordering for their members, 25% should accompany orders, balance due 30 days from date of invoice.

We can make shipment at any time from about October 15th to April 15th. Prices are delivered.

PLANTING ROSES

PLANTING—If you are not quite ready to plant when the parcel arrives from the nursery, you must take care that the plants do not dry out meantime. Holes should be dug wide enough and deep enough to receive the root system without twisting or crowding. Plant just deep enough to cover the junction of root and stem with one inch of soil. Spread out the roots evenly, giving them a downward tendency, return the soil and tread down firmly. Firm planting is very important, as loose soil dries out quickly, when the plants will be slow to start and may even die. If the ground has been previously dug and manured, manure at planting time will not be necessary, but if not, then the holes should be dug deep enough to receive a forkful of manure in the bottom, covered by an inch of soil to prevent the dormant roots coming in contact with it. Sometimes in spring, cold drying winds prevail after planting, which have a killing effect on newly planted roses, causing moisture to evaporate from the stems which is needed for the production of new growth. We have found that a good safeguard against just such conditions is to cover the newly set plants with sacks and soak with water twice daily; this will make dilatory plants start that would otherwise have died.

PRUNING—As these remarks are primarily intended for the first year, we will content ourselves by just saying that, after planting, all strong branches should be cut to about two inches and the weak ones cut right out.

WINTERING—We have found the best kind of winter protection is to hill up the plant with about six inches of soil. If the plants are in a bed, fill up the depressions made in hilling up with partly decayed manure well tramped down. When the ground is frozen, a covering of cornstalks or such like material may be given to help hold snow over the bed. Climbing roses should have their stems removed from their supports, laid on the ground and covered as above. In spring, roses thus covered must be uncovered before growth starts, but protecting material should be quickly available should severe frosts threaten. Wintering instructions are for the information of growers east of the Rocky Mountains and the colder parts of the United States.

PATENTED ROSES

They are Supremely Satisfactory

Alezane. H.T. (Pahissa, 1934.) Plant Patent No. 116. Retails \$1.25 each; \$12.50 per dozen. Bud urn-shaped, large, reddish brown; flowers cupped, opening to sorrel, unfurling from sorrel to rich apricot, and reverse of petals sorrel, striped with yellow veins. Petals not affected by hot or wet weather. Growth very vigorous, upright, branching. Dark green foliage. An extremely interesting and striking novelty. Starts blooming very early.

Countess Vandal. H.T. (M. Leenders & Co., 1932.) Patent No. 38. Retails \$1.00 each; \$10.00 per dozen. The Rose of Roses! "Countess" has been enthusiastically received by rose-lovers everywhere. Its long-pointed bud, its distinctive shadings of coppery bronze, suffused with soft gold, and its form are a continuous "movie," developing new beauty at all times during its long life.

Crimson Glory. H.T. (W. Kordes Sons, 1935.) Plant patent No. 105. Retails \$1.00 each; \$10.00 per dozen. Buds are long-pointed; flowers large, semi-double, full, deep velvety crimson, intensely fragrant and very lasting. Foliage abundant and leathery. Spreading and bushy grower; continuous bloomer. A very fine dark red rose.

Dicksons Red. H.T. (Dickson, 1939.) Plant Patent No. 376. Retails \$1.25 each; \$12.50 per dozen. A glowing scarlet-red rose from the Emerald Isle. The ripe warmth of its color is constant, its abundant bloom unflagging all through the summer. Happily, also, it is rich in the fragrance you instinctively expect in a red rose. If the sun has been cruel to your reds, here is a "must have" for your list—it defies the hottest sun's rays and retains its color undimmed. The blooms are produced singly on long, strong stems; it will be your favorite red rose for cutting. First Award All-America Rose Selection for Hybrid Tea Roses, 1940. Silver Medal Certificate, American Rose Society, 1939.

Eclipse. H.T. (J. H. Nicolas, 1935.) Plant Patent No. 172. Retails \$1.00 each; \$10.00 per dozen. Awarded prizes in Rome, Paris, and other test-gardens. Its long, stream-lined bud, enhanced by ornamental sepals, is of rich gold without shading. Petals are large and tough, but not numerous, averaging 20 to 25, with more in the autumn. Gold Medal, American Rose Society.

Hector Deane. H.T. (McGredy, 1938.) Plant Patent No. 361. Retails \$1.50 each; \$15.00 per dozen. A radiant newcomer from Ireland which accommodates itself happily and vigorously to our conditions. So fragrant is this rose that a single plant scents the whole garden with true old rose scent. The bud is crimson with a suggestion of orange in the depths, the orange diffusing as it opens, leaving at the heart only a clear circle of yellow. Certificate of Merit, A. R. S., 1939.

Rex Anderson. H.T. (McGredy, 1937.) Plant Patent No. 335. Retails \$1.25 each; \$12.50 per dozen. Handsome buds and roses of great size. Cream turning pure white with age. Good form of the usual McGredy standard. Blooms are several on each stem and come in rapid succession. The plant is very vigorous, with handsome dark green foliage. Gold Medal of N. R. S., and First Trial-Ground Certificate.

Rome Glory. H.T. (Aicardi, 1937.) Plant Patent No. 304. Retails \$1.25 each; \$12.50 per dozen. A cross of Dame Edith Helen and Sensation. This rose was bred with the objective of raising a red Dame Edith Helen and the objective has been reached. A most robust and vigorous plant, much more winter-hardy than most Hybrid Teas, producing in quick succession long stems bearing large crimson-red buds opening into full, well-formed, fragrant, cerise-red blooms. The flowers are long-lasting on the plant or when cut and are not affected by dry or wet weather.

SELECTED LIST OF NOVELTIES

Price 75c Each; \$6.50 per Dozen

Ami Quinard. H.T. 1927. Long pointed, blackish garnet bud opening into a loose, semi-double, fragrant bloom; so dark it seems almost black. A very vigorous bush with fine foliage. A persistent bloomer.

Christopher Stone. H.T. Scarlet-crimson. A thrilling rose in every way from the bud stage until the petals drop. It is unsurpassed for intense damask fragrance and seldom shows a trace of blue in the color. This is one of the newer roses that has come to stay, for it is "tops" in the reds for quantity of bloom and vivid color. In the fall it is especially lovely when it takes on more petals, and blackish shadings appear to soften and enrich the scarlet-crimson.

Duquesa de Penaranda. H.T. (P. Dot, 1931.) Color, copper-apricot, opening to splendid blooms of coppery-apricot, sweetly perfumed.

Frieda Krause. H.T. (M. Krause, 1935.) Orange scarlet. Large full double flowers on long stems. Leathery dark green foliage. Vigorous bushy growth. Blooms all season.

Gerald Hardy. H.T. (Alex. Dickson & Sons, Ltd., 1936.) Bright scarlet. Lovely full flower and delightfully scented. Strong bushy grower. Certificate of Merit, N.R.S.

Grenoble. H.T. (C. Mallerin, 1940.) The buds are crimson and open to a flower of brilliant scarlet; one of the best red roses and capable of being developed to exhibition size. Gold Medal, Saverne, 1930. Petal count, 30.

Gurney Benham. H.T. (B. R. Cant, 1935.) Vivid orange golden-yellow. Fine shaped flowers. A strong grower with mildew-proof foliage. Certificate of Merit, N.R.S.

Kardinal. H.T. (M. Krause, 1934.) Brilliant fiery scarlet. Large, well shaped flowers. Light green disease-resistant foliage.

Katherine Pechtold. H.T. (Verschuren Pechtold, 1934.) Coppery orange, flushed with rose and gold. A vigorous bushy grower with large leathery foliage.

Lily Pons. H.T. (Brownell, 1938.) Plant Patent applied for. Yellow. This sulphur-yellow rose marks the successful effort of Mr. Brownell to produce a sub-zero, fragrant, full-petaled yellow Hybrid Tea, which has been achieved after many years of painstaking work.

Lord Lonsdale. H.T. (Alex. Dickson & Sons, Ltd., 1933.) Brilliant daffodil-yellow, large full flowers. Awarded Gold Medal, N.R.S.

McGredy's Yellow. H.T. (McGredy, 1933.) Large buttercup-yellow, strong upright growth.

McGredy's Ivory. H.T. (McGredy, 1929.) Creamy-white, of soft and delicate tone that merges into a light yellow base. Free and perpetual flowering. Foliage is a very dark green, which provides a brilliant contrast to the pale-hued blooms which are borne erect on long, stout stems.

Peter Pan. H.T. (1929.) Deep orange, similar in shape to Emma Wright, but deeper in color. Flowers very freely, and every bloom is of perfect form. Foliage deep bronzy-green. Certificate, N.R.S.

Picture. H.T. Clear velvety rose-pink with full flower, perfectly formed. An ideal rose for the garden or for cutting.

Susan Louise. Unusually long slender buds, opening to full blooms of dainty pink. An offspring of Belle of Portugal.

Soeur Therese (Sister Therese). H.T. Yellow. Long-pointed buds are chrome-yellow, heavily marked with carmine; the open flower is rich daffodil-yellow and holds its color well. Sweetbriar fragrance. The blooms come freely on splendid cutting stems.

POLYANTHAS **50c Each; \$5.00 per Dozen**

Alice Amos. (Jan. Spek, 1922.) Large, single flowers of bright cherry-red with white center, borne in immense clusters throughout the whole summer and fall.

Edith Cavell. (Meiderwyk, 1917.) Small, semi-double flowers of bright scarlet red, produced in great trusses.

Ellen Poulsen. (D. L. Poulsen, 1912.) Large, full flowers of bright flesh pink, produced in great clusters on a sturdy branching plant.

Else Poulsen. (D. L. Poulsen, 1924.) Semi-double flowers of rosy-pink and carmine. A free and continuous bloomer. One of the best polyantha roses.

Gloria Mundi. (G. de Ruiter, 1929.) Rather large, fully double, lasting flowers of glowing orange-scarlet, borne in clusters. Foliage, abundant, light green, and glossy. Vigorous, bushy plant and abundant bloomer.

Gruss an Aachen. (Geduldig, 1909.) Orange-red and -yellow buds, and light flesh-pink and salmon-yellow flowers with deeper center, fading lighter, very double, much like a bunch-flowered Hybrid Tea; faintly perfumed. Very strong, branching plant, healthy and continually in bloom.

Ideal. (J. Spek, 1922.) Small, dark scarlet blooms shaded with black, borne with tremendous profusion in immense, compact bunches. Plant quite vigorous, rather long branching, continually in bloom.

Kirsten Poulsen. (H. T. Poulsen, 1924.) Beautiful bright scarlet with golden anthers. Very showy, single, splendid bedder.

Lady Reading. (Van Herk, 1921.) Clear red small globular flowers. Free flowering and dwarf growing.

Mrs. Finch. Bright rose-pink flowers in branching, fragrant clusters.

Paul Crampel. Flaming orange-scarlet, holding its color to the end. Good in rain or sunshine.

Sparkler. Brilliant red. An improvement on existing reds.

GENERAL LIST

50c Each; \$5.00 per Dozen

Admiration. H.T. (S. McGredy & Son, 1922.) Pointed buds of salmon-rose, large, high-centered blooms of cream-white, heavily shaded with light orange-vermillion. Fragrant and fairly free-flowing. A vigorous, healthy plant.

Angele Pernet. H.T. (Pernet-Ducher, 1924.) Brownish-orange blooms of excellent shape, although only semi-double.

Amulet. H.T. (Tantau, 1930.) Fiery red. A high-centered rose of good form and size; free-flowering. Good foliage.

Autumn. A rose of gorgeous coloring, a combination of scarlet-cerise and gold. Flowers of moderate size and good shape. Growth free and upright.

Barbara Richards. H.T. (A. Dickson, 1930.) Flower large, full, well formed, fragrant, maize-yellow and buff, flushed rose. Growth vigorous, free-bloomer.

Barbara Robinson. H.T. (A. Dickson & Son, Ltd., 1907.) Cream; buds long and pointed, well-shaped flower, very free-flowering.

Bedford Crimson. H.T. (Laxton, 1926.) Dark velvety crimson. Free-flowering. A fine bedding rose. Clay Cup, R.H.S., 1924.

Bertha Gorst H.T. (G. Beckwith & Sons, 1933.) Color, fiery crimson cerise with gold at base. Thick, velvety petals. Strongly perfumed. Vigorous grower. Certificate of Merit, N.R.S.

Betty Uprichard. H.T. (A. Dickson & Sons, Ltd., 1922.) A splendid shade of glowing salmon-pink and carmine; very vigorous; a very fine variety.

Briarcliff. H.T. (Briarcliff Greenhouses, 1926.) Large, pointed buds, and double, high-centered blooms of brilliant rose-pink, fragrant and long lasting. Stems stiff and long.

Caledonia. H.T. (Dobbie & Co., Ltd., 1929.) Bud large, long-pointed; flower large, extremely double, high-centered, very lasting, slightly fragrant, white, borne singly on long, strong stem; foliage sufficient, large, dark green, buds and flowers of exquisite form, large and fragrant. Strong-growing plant, almost constantly in bloom.

Catalonia. H.T. Orange-scarlet. The buds are deep rich carmine stained with orange and open to a 50-petaled flower of glowing orange-scarlet. Richly fragrant. No other rose matches it in color, and it simply glows like a beacon in our gardens.

Catherine Kordes. H.T. (Kordes, 1930.) Large double flower. Glowing dark scarlet. Abundant, leathery, disease-resistant foliage.

★ EDDIE'S HARDY, NORTHERN-GROWN ROSES ★

Cecile Brunner. D.P. (Introduced by Pernet-Ducher in 1880.) The old favorite sweetheart rose. Small long pointed buds, bright pink on yellow ground, borne in clusters. Vigorous bushy dwarf. A free and continuous bloomer.

Charles K. Douglas. H.T. (H. Dickson, 1919.) Fine, long-pointed buds opening to large, loosely formed flowers of striking crimson-scarlet; slightly fragrant. Strong, branching growth and an abundance of healthy foliage.

Condesa de Sastago. H.T. (P. Dot, 1932.) The bud is like a ball of gold with brilliant red stripes. When fully open it shows fiery copper on the inside of petals and rich gold on the reverse. The most striking combination of color. Gold Medal International Rose Test Garden, Rome, 1934. Petal count, 45.

Chas. P. Kilham. H.T. (Beckwith & Sons, 1926.) Large, beautifully shaped flowers of brilliant orange, suffused with glowing scarlet, slightly fragrant. Foliage resistant to mildew; vigorous, bushy, upright.

Col. O. Fitzgerald. H.T. (A. Dickson, 1917.) Blood-red, velvety crimson. Very fine shape.

Conqueror. H.T. (Chaplin, 1929.) Apricot shaded orange-red. Shiny mildew-resistant foliage.

Covent Garden. H.T. (B. R. Cant & Sons, 1919.) Medium sized, well formed flowers of deep, rich crimson, shaded black on the reverse of the petals. Vigorous, upright; continuous bloomer.

Crimson Emblem. H.T. (S. McGredy & Son, 1916.) Bright red, semi-double blooms, borne in large trusses on a tall-growing, very vigorous plant.

Dame Edith Helen. H.T. (Alex. Dickson & Sons, 1926.) Pure glowing pink, not too deep. A noble flower, large and fragrant, full, of perfect form and opening well in all weathers. Delightfully fragrant. Gold Medal, N.R.S.

Dorina Neave. H.T. (J. H. Pemberton, 1926.) Large, full, pointed-globular, very fragrant flowers of silvery-pink, borne upright on stiff stems. Growth compact.

Duchess of Atholl. H.T. (Dobbie, 1927.) Coppery orange flushed old rose. Large double flower. Vigorous upright grower with deep bronze foliage. Certificate of Merit, N.R.S.

Duchess of Wellington. H.T. Yellow. A delightful rose from the famous Dicksons of Ireland who introduced it in 1909, and it is still a great favorite because of its chrome-yellow buds which are very large, long-pointed, and marked with carmine. The open blooms, with heavy tea fragrance, are buff-yellow, deeper toward the center, and furnished with a mass of golden stamens. Continuous in bloom. A really great budding rose and fine for cutting.

Edel. H.T. (S. McGredy & Son, 1919.) White with faint ivory shading towards the base; well-built flower; fine grower, stout habit, scented.

Edith Nellie Perkins. H.T. (A. Dickson & Sons, 1928.) Large double flowers with fine-pointed center, inside of petals salmon-pink, outside dark coppery-red and orange. A good grower and bloomer with few thorns and splendid foliage.

Editor MacFarland. H.T. (1929.) Belongs to the Radiance group for vegetation. Long, pointed, pink bud with a glow of amber and a paler edge. Good for cutting.

Earl Haig. H.T. (A. Dickson & Son, 1919.) Deep reddish-crimson, a solid color that does not fade; good form; high center; large petals and sweetly scented.

Edith Krause. H.T. (Max Krause, 1939.) Flower large, double, high-centered, very lasting, moderately fragrant. Greenish-white (like "Kaiserin Auguste Viktoria"). Foliage abundant, large, glossy, few thorns. Growth vigorous, upright; continuous bloomer.

E. G. Hill. H.T. Crimson. The flowers are large, full, brilliant crimson, and as they come singly on strong, erect stems, are splendid for cutting. Produces richly fragrant, 50-petaled flowers.

Essence. H.T. (B. R. Cant, 1930.) A beautiful rose of deep velvety crimson. Strong, bushy grower. Certificate of Merit, N.R.S.

Etoile de Hollande. H.T. (H. A. Verschuren & Sons, 1919.) Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. Plants branching, particularly free-flowering, healthy.

Feu Joseph Looymans. H.T. (P. J. Looymans & Co., 1922.) Long-pointed buds, resembling those of Sunburst; large fairly full flower of yellow, with vivid apricot tints, giving it a brilliant effect in the center. Growth strong, straight and bushy.

F. J. Grootendorst. (F. J. Grootendorst & Sons, 1923.) Clusters of small fringed, crimson blooms during the whole flowering season. A vigorous bushy shrub, absolutely hardy and constantly in flower.

Frau Earl Druschki. H.P. (P. Lambert, 1900.) Pinkish buds and magnificent snow-white blooms with deep, firm petals, forming a flower of unimpeachable shape, but without fragrance. Plant one of the strongest—grows 4 to 10 ft. high; foliage normal; blooms freely and continuously.

General McArthur. H.T. (E. G. Hill & Co., 1905.) Crimson-scarlet buds and blooms, usually well shaped and very fragrant. The plant is erect, flowering freely in successive crops, with good foliage.

George Dickson. (A. Dickson & Sons, 1912.) Immense, deep red velvety blooms of the most perfect shape; very fragrant. Strong-growing.

Golden Dawn. H.T. (Grant, 1929.) Rich sunflower-yellow flushed with old-rose. Large, full flowers of fine form.

Golden Emblem. H.T. (S. McGredy & Son, 1917.) Intensely yellow buds and blooms of superb shape and texture, borne freely on erect, branching plants with tough glossy foliage.

Golden Ophelia. H.T. (B. R. Cant & Sons, 1918.) Well-shaped blooms with a heart of golden yellow, shading lighter toward the edges of the flower, and delicately perfumed. The plant is robust and healthy, blooming with great freedom.

Gruss an Teplitz. H.T. (Gescwindt, 1897.) Small to medium-size double blooms of brilliant crimson with velvet shadings and intense fragrance. Blooms in open clusters with the utmost freedom throughout the whole season. Bush extremely vigorous and hardy.

Heinrich Wendland. H.T. (Kordes, 1930.) Outside of petals clear golden-yellow, inside brownish-red. Flowers very large, high-centered and lasting. Good disease-resistant foliage.

Hinrich Gaede. H.T. Multi-colored. Long-pointed, shapely bud of nasturtium-red color. Kaleidoscopic flowers—rich, luminous vermillion, shaded golden yellow. Fruity fragrance.

Hoosier Beauty. H.T. (F. Dorner & Sons, 1915.) Splendid dark red blooms of powerful fragrance. Plant healthy but erratic in growth and not especially free-flowering.

Hugh Dickson. H.P. (H. Dickson, 1905.) Brilliant scarlet-crimson blooms, large, full and fragrant. Extremely vigorous growth, established plants bloom throughout the season.

Imperial Potentate. H.T. (Clark Bros., 1922.) A firm-petaled bloom of dark, shining rose-pink, shaded lighter on reverse of petals.

Impress. H.T. (A. Dickson, 1929.) Large, ovoid bud, cardinal red shaded orange, flower very large and double, salmon-cerise, suffused with a luminous golden sheen. Foliage dark green, glossy. Vigorous upright grower.

Independence Day. H.T. (Bees, Ltd., 1919.) Flaming yellow buds, heavily shaded with copper and brown, opening quickly to a moderately large flower of 15 to 20 petals which rapidly fade to light orange-pink. Strong, upright branching habit.

Innocence. H.T. (Chaplin Bros., 1921.) Tapering, urn-shaped buds, opening to enormous, single, pure-white blooms adorned with a giant center of wine-red stamens tipped with golden anthers. The plant is strong, branching and healthy, flowering freely.

Isobel. H.T. (S. McGredy & Sons, 1916.) Carmine, flushed orange-scarlet; large flowers freely produced, single; beautiful for bedding, massing or cutting; sweetly scented.

I. Zingari. H. Foet. (Pemberton, 1925.) Flower semi-double, vivid orange-scarlet, produced continuously in corymbs. Foliage rich dark green.

J. C. Thornton. H.T. (Bees, Ltd., 1926.) A gold medal rose of great importance. Fine, full, well-shaped flowers; bright scarlet crimson; vigorous; good foliage; free-flowering; a fine bedder. Gold Medal, N.R.S., 1928.

Joanna Hill. H.T. (J. Hill Co., 1928.) Bud very large, long-pointed; flower very large, full and long-lasting, darker yellow than Sunburst, borne singly on long stems. Foliage dark green, leathery. Vigorous grower.

John Russell. H.P. (Dobbie & Co., 1924.) Charming shade of deep velvety crimson; fine flower of good size, perfect shape and large solid petals; free-flowering.

Joyous Cavalier. H.T. (W. E. R. Archer & Daughter, 1926.) Glowing scarlet. Makes a fine low hedge. Free-flowering.

Jules Goujard. Pern. (J. Goujard, 1929.) Very large cupped, extremely lasting and intensely fragrant flowers of bright orange-red flushed with carmine, of uniform shade, borne singly on strong stem. Foliage bright green, disease-resistant. Growth very vigorous.

Julia, Countess of Dartrey. H.T. (Dr. J. Campbell Hall, 1927.) A very large flower of fine shape; the color is tyrian rose with a yellow base; fine large foliage; free-flowering. A grand exhibition rose.

K. of K. H.T. (Kitchener of Kartoum.) (A. Dickson & Sons, 1917.) Brilliant scarlet-red buds and open, semi-double flowers and blazing red with a blackish velvet sheen; fragrant. Plants vigorous and extremely free-flowering throughout the season.

Kaiserin Auguste Viktoria. H.T. Cream-white. Long, shapely buds open to full-petaled cream-white, deliciously scented flowers. One of the best roses for cutting.

Lady Margaret Stewart. Pern. (A. Dickson & Sons, Ltd., 1926.) Deep sunflower-yellow, heavily veined and splashed with orange-scarlet, reverse of petals deeply marked with carmine; as bloom develops, these shades intermingle, forming in the fully developed flower a beautiful cadmium-orange effect. Free from mildew and blackspot. Very sweetly scented.

Lady Craig. H.T. (H. Dickson, 1921.) Perfectly formed, tapered buds of yellow-cream, opening slowly into exquisite creamy blooms tinted yellow in the center. Plant of moderate growth.

Lady Forteviot. Pern. (B. R. Cant & Sons, Ltd., 1928.) This is a Hybrid Pernetiana, and a bedding rose we can confidently recommend. Golden-yellow deepening to rich ruddy apricot; large flowers with big petals exceedingly sweet, fruity fragrance.

Lady Hillingdon. H.T. (Lowe & Shawyer.) Deep apricot-yellow, long-pointed bud, very free-flowering, tea-scented.

Leonard Barron. H.T. (Conard & Pyle, 1934.) A rose of Nutkana parentage and, we hope, a fore-runner of a new race of roses. The color is salmon-copper blended with shell-pink. The flowers are of immense size and sweetly fragrant. Petal count, 75.

Li Bures. H.T. (P. Dot, 1928.) Bud and flower medium size, full fragrant, rose-red and yellow mixed. Foliage large, glossy green. Growth vigorous.

Lord Rossmore. H.T. (Dr. Campbell Hall, 1930.) Creamy-white, shaded and margined rose towards edge of petals. Large flowers. Growth is strong, free and upright; mildew-proof foliage. Delicate tea perfume that adds to its charm either as a garden or exhibition variety. Gold Medal, N.R.S.

Los Angeles. H.T. (Howard & Smith, 1916.) Very lovely buds and exquisite flowers of salmon-pink, with yellow shading, and very sweetly scented. It blooms well throughout the season.

Lucie Marie. H.T. (A. Dickson, 1930.) Bud very long-pointed, yellow splashed red; flower large, lasting, fragrant, buttercup-yellow washed apricot-orange. Foliage leathery dark green. Vigorous grower.

Mabel Morse. H.T. (S. McGredy & Son, 1922.) Clear, unstained yellow buds and well-shaped, fragrant flowers. Spreading, bushy growth and liberal bloom. Foliage remarkable for its beauty and resistance to disease.

Marcia Stanhope. H.T. (G. Lilley, 1922.) Sweetly scented white rose, nicely shaped blooms and very free; wonderful foliage.

Margaret Dickson Hamill. H.T. (A. Dickson & Sons, 1915.) Globular blooms of straw-yellow with large shell-like petals and some fragrance. Plant is strong, free-flowering, and dependably free from blackspot or mildew.

Margaret McGredy. H.T. Orange-scarlet. We have yet to find a more continuously satisfactory, large, full-petaled everblooming rose than Margaret McGredy. The olive-green, leathery foliage is disease-resistant, and the buoyantly vigorous growth insures a constant production of buds and blooms from early in June until hard frost. In the newly opened flower the color is a scintillating orange-scarlet which ages to a pleasing carmine-rose. It has lovely rose fragrance.

Max Krause. H.T. (Krause, 1930.) Reddish-orange changing to lighter tone as bloom ages.

May Wettern. H.T. (A. Dickson & Sons, 1928.) Fine, shapely flowers of deep rosy-pink, with recurring petals showing a paler tint; mild tea fragrance. Excellent stems and foliage; free growth and blooming.

McGredy's Gem. H.T. (McGredy, 1933.) Creamy-pink with a yellow base, deepening to rose-pink towards the edge of the petals. Makes a bush three feet or more in height, laden with flowers on long stems from early June to November.

McGredy's Orange. H.T. Medium-sized double flowers, inside and base of petals deep Indian-yellow without shading, outside bright orange flushed salmon; tea fragrance. Foliage dark green, growth very vigorous and upright. On account of its new and unique coloring, this magnificent rose will take a prominent position in the garden. Petal count, 15.

McGredy's Scarlet. H.T. (McGredy, 1930.) Flower large, full, fragrant, brilliant scarlet-washed crimson. Foliage dark olive green. Growth vigorous. Certificate of Merit, N.R.S., 1928.

Miss Rowena Thom. H.T. (Howard & Smith, 1928.) Enormous buds and blooms of fiery rose and mauve, shaded with old-gold at the center, borne on long, strong stems. A profuse, continuous bloomer and a very vigorous plant.

Miss Wilmott. (S. McGredy & Son, 1917.) Soft, sulphury-cream, with the faintest flush towards the edges. Every flower comes perfect; free-flowering. A wonderful garden, bedding and exhibition rose.

Mme. Butterfly. H.T. (E. G. Hill Co., 1918.) Fine, light pink buds and flowers tinted with gold near the base of the petals, of exquisite shape and richly perfumed. Plant is strong, throwing up big branching sprays of bloom.

Mme. Caroline Testout. H.T. (Pernet-Ducher, 1890.) Large, globular flowers of satiny-rose, shaded lighter toward the outer edge of its enormous petals; fairly fragrant. Plant strong and persistent bloomer.

Mme. Edouard Herriott. H.T. (Pernet-Ducher, 1913.) Sparkling buds of coral-red and orange, opening to large, semi-double flowers of indescribably brilliant orange-red and salmon. Very persistent bloomer.

Mme. Henri Pate. H.T. (Gaujard, 1929.) Bud very long pointed; flowers very lasting, pure golden sulphur-yellow. Foliage large, bright green. Growth vigorous. Profuse bloomer.

Mme. Jules Bouche. H.T. (Croiber, 1910.) White with light cream center. Full and perfectly shaped flowers. One of the best roses for the garden or for cutting.

Mrs. A. R. Barraclough. H.T. (S. McGredy & Son, 1926.) Bright, soft, sparkling carmine-pink, shading to yellow at base. The flowers are full, of huge size, fine substance and perfect form. Foliage is dark green; stems are long and sturdy, carrying flowers perfectly erect.

Mrs. Aaron Ward. H.T. (J. Pernet-Ducher, 1907.) Indian yellow, occasionally washed with salmon-rose. Sweetly scented, free flowering.

Mrs. Beatty. H.T. (B. R. Cant & Sons, Ltd., 1926.) One of the best roses of its year, perfect in shape, color exquisite yellow. Delightful perfume. A rose that is almost certain to become a popular favorite.

Mrs. Beckwith. H.T. (Pernet-Ducher, 1922.) Long, deep yellow buds, opening to medium-size, fairly full blooms of strong lemon-yellow, paling to white at edges; somewhat fragrant. Plant is of moderate, erect growth, with healthy foliage.

Mrs. E. P. Thom. H.T. (Howard & Smith, 1926.) Slender yellow buds, large, well-shaped blooms of bright canary-yellow, deepest in center. The plant is of exceptional vigor and blooms very freely.

Mrs. Franklin Dennison. (McGredy, 1915.) Porcelain white, veined primrose. A fine exhibition rose. Certificate of Merit, N.R.S.

Mrs. G. A. Van Rossem. H.T. (H. A. Verschuren & Sons.) Large flowers on strong erect stems. Heavy shades of deep orange and apricot on a golden-yellow ground, outside of petals a deep bronze. A new color in roses.

Mrs. George Geary. H.T. (Burbage, 1929.) Glowing orange-cerise shaded cardinal. Large, full blooms of good shape.

Mrs. H. R. Darlington. H.T. (S. McGredy & Son, 1920.) Pale, creamy or pure white blooms of enormous size, faultless form and some fragrance.

Mrs. Henry Bowles. H.T. (Chaplin Bros., 1921.) Ovoid buds and globular flowers on clear, piercing pink with lighter shades. A fine, firm center, well held and fairly fragrant.

Mrs. Henry Morse. H.T. (S. McGredy & Son, 1919.) A bright flower of two outlasting tones of pink, with an underlying yellow glow. Plant tall and branching; foliage a little sparse.

Mrs. Pierre Du Pont. H.T. (Mallerin, 1929.) Bud medium size, long-pointed; flower very lasting, fragrant, deep golden-yellow. Foliage abundant, rich green. Growth vigorous. Gold Medal, Bagatelle, 1929.

Mrs. Sam McGredy. H.T. (S. McGredy & Son, 1932.) A beautiful scarlet-coppery-orange, is heavily flushed with Lincoln red on the outside of the petals, and these colors together give a rich and almost dazzling effect. The delicately-perfumed flowers are of large size and beautiful form. The foliage is a handsome dark reddish-bronzy-green and is mildew-proof.

Ophelia. H.T. (W. Paul & Son, 1912.) Salmon-flesh, shaded with rose and with apricot heart, perfect shape and habit, sweetly scented. Very beautiful and popular.

Oswald Sieper. H.T. (M. Krause, 1933.) One of the finest white roses. Beautifully formed buds opening to large double flowers of creamy-white carried on long stout stems. A good exhibition rose. Petal count is 35.

Padre. H.T. (B. R. Cant & Sons, Ltd., 1920.) Strong upright growth, long shoots producing flowers with fine long petals of coppery-scarlet coloring, flushed with yellow at base of petals.

Percy Izzard. H.T. (Robinson, 1936.) Clear deep cream, deepening to golden yellow and shading to pearly pink at the tips. Handsome flower opening well in all weather. Certificate of Merit, N.R.S.

Phyllis Gold. (H. Robinson, 1935.) Golden yellow, well-formed blooms with high center; strong, stiff petals, Growth vigorous and upright. Olive green foliage with black thorns. One of the best yellow roses ever introduced. Gold Medal, N.R.S.

Picture. H.T. (McGredy, 1932.) Clear velvety rose-pink with full flower, perfectly formed. An ideal rose for the garden or for cutting.

President Herbert Hoover. H.T. (L. B. Coddington, 1930.) Bud large, long-pointed; flower large, semi-double, very lasting, fragrant, medium orange except two outside petals which fade to lighter shade. Foliage leathery, disease-resistant. Growth vigorous; free-bloomer. Gold Medal, International Flower Show, New York, 1929.

Radiance. H.T. (J. Cook, 1908.) Brilliant rose-pink buds, opening to well-formed shining flowers with lighter tints on the reverse of the petals. This plant makes wonderful growth and has splendid blooming qualities.

Rapture. H.T. (Traendly & Schenck, 1926.) Fine, pointed buds and blooms of glowing pink. Plants strong and free-flowering.

Red-Letter Day. H.T. (A. Dickson & Sons, 1914.) Brilliant scarlet buds and almost single flowers of fair size, borne on plants of notable vigor with an extravagant abandon hard to equal.

Red Radiance. H.T. (Gude Bros., 1916.) An even better rose than its parent; Radiance in habit, bearing big globular flowers of deep rose-red on strong, individual canes which are freely produced all summer.

Reveil Dijonnais. Pern. Golden-yellow shaded carmine. Large semi-double flowers. A pillar rose of great beauty.

Rev. F. Page-Roberts. (B. R. Cant & Sons, 1921.) Copper-red buds of great length opening to golden-yellow blooms stained outside with red, fully double. Strong branching plant with healthy foliage.

Roselandia. (W. Stevens, Ltd., 1924.) Typical Ophelia buds and blooms of rich golden-yellow, fragrant and free-flowering. Excellent foliage and habit.

Shot Silk. H.T. (A. Dickson & Sons, Ltd., 1924.) Cherry-red overshot salmon-orange, flushed rose and deeply veined, clear buttercup-yellow at base. Dark green foliage. A handsome bedding rose.

Sir Basil McFarland. (McGredy, 1931.) Color is orange-salmon-pink with a beautiful orange sheen heavily flushed and veined yellow. Foliage dark green with strong stems carrying the flowers upright.

Sir David Davies. H.T. (S. McGredy & Sons, 1926.) Unfading deep glowing crimson, running to yellow at base. Flowers large and full. Bright green foliage, strong habit, free-flowering, vigorous, very sweetly scented.

Sir Henry Segrave. H.T. (A. Dickson, 1932.) Primrose-yellow with chrome base. Very large, full and pointed. Growth vigorous and free. Gold Medal, N.R.S.

Souvenir de Claudius Pernet. Pern. (P. Pernet-Ducher, 1920.) Clear yellow flowers, very large and full. Free-flowering, vigorous, brilliant green foliage.

Star of Persia. Foetida Hybrid. (J. H. Pemberton, 1919.) Bright yellow flowers, single, about three inches across, with petals prettily fringed at edges. The plant is strong growing and is good as pillar rose or low climber.

Syracuse. H.T. (Mallerin, 1930.) A large full double scarlet crimson flower with slight fragrance, lasting long on the plants. One of the most desirable red roses. Moderate grower and heavy bloomer.

Talisman. H.T. (Montgomery Co., 1929.) Bud medium size, long-pointed, richly colored; flower medium size, double, long-lasting, extremely fragrant, golden-yellow and copper, borne singly on long stem. Growth vigorous. Foliage large, dark green.

Vesuvius. H.T. (S. McGredy & Son, 1923.) Long, tapering buds opening to very large, single flowers of dark, velvety crimson. It is moderately fragrant.

Victoria Harrington. H.T. (Capt. Geo. C. Thomas, 1931.) Rich, velvety crimson. Perfectly-shaped buds opening to medium-sized, cactus, dahlia-like flowers. A vigorous grower with healthy, disease-resistant foliage.

Ville de Paris. H.T. (Pernet-Ducher, 1926.) Round buds of clear yellow and big globular flowers of the same hue, untouched by any other color. Plant is notably tall and wiry and the foliage dark, small and very leathery.

W. E. Chaplin. Deep crimson. The flowers are moderately large, pointed, and of good shape; the growth is vigorous, free and perpetual. A very fine rose.

White Ensign. H.T. (S. McGredy & Son, 1926.) Pure-white flowers of perfect shape, produced in great abundance. Plant stocky with dark green foliage.

William Kordes. Pern. (W. Kordes & Sons, Ltd., 1922.) Capucine-red on a golden-yellow ground, fairly full, good form, wonderfully prolific, fine habit.

Wm. Moore. H.T. (McGredy, 1935.) Color, beautiful carmine-pink. Large full blooms of perfect shape. A good exhibition rose.

Wm. Orr. H.T. (McGredy, 1930.) Brilliant deep velvety crimson. Large, full, perfectly-formed flowers. Dark green, mildew-resistant foliage. Clay Vase, N.R.S. 1931.

CLIMBERS

Price 50c Each; \$5.00 per Dozen

Albertine. H.W. (Barbier & Co., 1921.) Vermilion buds and coppery-chamois-yellow flowers, passing to coppery-rose; large, rather loosely formed. Blooms in clusters. Beautiful leathery shining foliage with reddish-tipped leaves.

American Beauty. Cl. Deep pink; free-flowering.

American Pillar. (Dr. Van Fleet, 1902.) Large crimson-pink flowers with white centers and golden-yellow stamens. Very vigorous.

Bonfire. Mult. (E. Turbat & Co., 1928.) Flowers double, dazzling scarlet, borne in large, elongated clusters of 20 to 25 blooms. Growth very vigorous, climbing; very early bloomer.

Cecile Brunner. A vigorous climbing sport of the well-known "Sweetheart Rose."

Chaplin's Pink Climber. H.W. (Chaplin Bros., 1928.) Substantial broad trusses of wide, flat flowers in a brilliant shade of clean, pure pink which is retained from bud to full-grown flower. The plant is vigorous and extremely free-flowering, covering itself completely with sheets of bloom.

Duchess of Atholl. (Dobbie, 1927.) Coppery-orange flushed old rose. Large double flower. Vigorous upright grower with deep bronze foliage.

Dr. Huey. (Capt. Geo. C. Thomas, 1914.) Deepest crimson-maroon, shaded black. Large, semi-double flowers borne in profuse clusters on a healthy, vigorous plant.

Dr. Van Fleet. (Dr. W. Van Fleet, 1910.) Pale pink buds and flowers equal in form and size to the finest Hybrid Teas; borne on long, individual stems. The plant makes enormous thorny canes and produces thousands of flowers.

★ EDDIE'S HARDY, NORTHERN-GROWN ROSES ★

Etoile de Hollande. (H. A. Verschuren & Sons, 1919.)

Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. Plants branching, particularly free-flowering and healthy.

Excelsa. (M. H. Walsh, 1910.) Bright scarlet double flowers in large trusses. The best vigorous scarlet climber.

General McArthur. A climbing sport of the bush of the same name and equally as good.

Golden Emblem. A climbing type of the well-known bush rose. The rose is flecked yellow and carmine edges, glossy mildew-proof foliage.

Hadley. (Teschendorff, 1927.) Climbing sport of Hadley.

Hoosier Beauty. A sport of the bush of the same name.

Jacotte. (Barbier & Co., 1920.) Bright coppery-orange-salmon with clear yellow base, semi-double, grand foliage. A fine, vigorous rambler.

K. A. Victoria. Cream-white.

Lady Hillingdon. A climbing sport of the well-known and popular bush of the same name.

Lord Charlemont. Another new addition to the climbers.

Long buds opening to large double-flowers of intense clear crimson-scarlet. You admired this in the bush form. You will be equally pleased with the climbing form.

Los Angeles. A climbing sport of the well-known bush variety.

Mable Morse. A vigorous grower, sport of this well-known variety.

Mrs. A. Ward. (J. Pernet-Ducher, 1907.) Indian-yellow, occasionally washed with salmon-rose. Sweetly scented, free-flowering.

Mrs. E. P. Thom. Climbing sport of the well-known bush of the same name.

Paul's Scarlet. (W. Paul & Son, 1916.) Intense pure-scarlet, semi-double flowers in clusters. During the flowering season the plants are a wonderful sight. Makes a wonderful pillar or pergola rose.

Paul's Lemon Pillar. Pale sulphur-yellow, good size and form. A fine pillar rose.

President Herbert Hoover. (L. B. Coddington, 1930.) Bud large, long pointed; flower large, semi-double, very lasting, fragrant, medium orange except two outside petals which fade to lighter shade. Foliage leathery, disease-resistant. Very vigorous grower and free-bloomer.

Shot Silk. A climbing sport of the bush of the same name. Exceptionally good.

Soleil d'Orient. Yellow with Indian-red tinge. Medium size. Green foliage. Very attractive. Semi-open type.

Souv. de Cl. Denoyel. (Chambard, 1920.) Large crimson flowers of good shape. A vigorous pillar rose.

Talisman. (Montgomery Co., 1929.) Bud medium size, long-pointed, richly colored; flower medium size, double, long-lasting, extremely fragrant, golden-yellow and copper, borne singly on long stem. Growth vigorous. Foliage large, dark green.

Wm. Kordes. (Wood & Ingram, 1927.) Strong climbing sport of Wilhelm Kordes.

At the New York World's Fair the famous rose garden used Vigoro exclusively for two years.

Use Vigoro on your roses.
